

UAW Local 2083 ZF Chassis System, LLC Tuscaloosa, Alabama

Strike Day 1

On March 12, 2020 UAW Local 2083 went on strike against ZF Chassis Systems, LLC in Tuscaloosa, Alabama. The nearly 300 - member local has been in negotiations for the past seven months trying to reach a fair and equitable contract. It is unfortunate that the company has discharged three of the six bargaining committee members in February. This action has not divided or caused fear with the membership liked hoped, but it had just the opposite effect. It not only strengthened the bargaining committee but the membership as well. The three discharged committee members has not quit fighting for the membership. They are active everyday walking the picket line and continuing to meet with the UAW local bargaining to make sure the members concerns are addressed. During the seven months of negotiations there has been three extension given, hundreds upon hundreds of discussions and demands exchanged in attempt to get a contract for the membership. We have taken the company's proposals to the membership three times and each time it was voted down by a large margin of the membership. Not only is this membership standing up for themselves, but also showing the support to their discharged committee members and the overall labor community in Tuscaloosa, Alabama. Please stand strong with these striking brothers & sisters as this was not a decision they have taken lightly.

Local 2083 members could use our prayers and financial support as they fight to last one day longer to ensure their membership receives the best contract possible. If your local would like to take a collection to help Local 2083 members, contact the Region 8 Office to get the donations to these members. The members of local 2083 wants to express their Solidarity, Strength, love and prayers to Local 1407.
