

Sticker Reflecting Union Pride displayed on US made vehicles

During the 2019 National Negotiations, your bargaining team won the right to place a sticker on the vehicles that our UAW members build, demonstrating union pride and quality to our customers. These new stickers have begun to be applied to the 2021 model year vehicles currently being produced in UAW FCA facilities. As a reminder, every benefit/gain we have, even a sticker reflecting the pride and quality of our work manufacturing the best vehicles in the world, must be obtained through the bargaining process. Our commitment to this process will only serve to bring us additional achievements in the future. We are proud of this recognition of the hard-working members of the UAW.
