

Hey DTNA! 4.19.2021 Vice President Kamala Harris Visits TBB

Hey DTNA!

Sharing the news that we welcomed a very special guest to the Thomas Built Buses facility in High Point, North Carolina today.

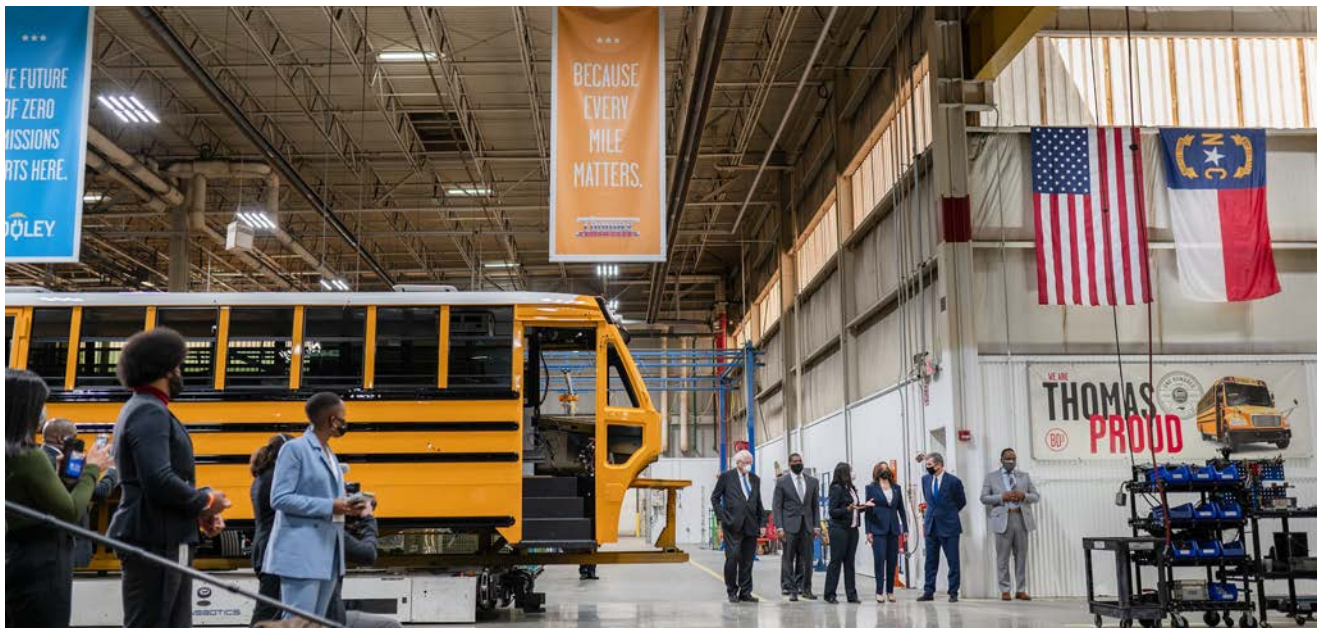

Vice President Kamala Harris toured the production line of the all-electric Saf-T-Liner C2 Jouley, remarking on the astounding ingenuity and dedicated manufacturing excellence of our TBB team.

With nearly 50 of these all-electric buses in the hands of our customers, and more to follow soon - the word about TBB and Jouley is certainly getting out!

See the gallery below for images from the Vice President's visit.
